"The impact of the biomass domestic heating appliances on air quality and the
relevance of their management"

The conference will be dedicated to the results achieved by PREPAIR project on the topic of biomass for domestic heating. The first part will focus on the experiences and results achieved through the project's actions, as a result of effective communication and constant comparison between different professional expertises. During the second section, a representative of national and international experts will be invited to provide specific insights into the policies, challenges and strategies for air quality at the European level. The event will close with a round table among the environmental directors of the territories involved in the project.

Milan – 1st June 2023

Sala Pirelli - Via Fabio Filzi 22, Milano

Chairman: Fabrizio Piccarolo, FLA; Antonio Ballarin Denti, FLA
